Technology, versatility and reliability from Sirius

ESSENCE

ESSENCE is the new built-in hood by Sirius. It has an intuitive touch control interface, which allows the user to activate the glass opening in two different steps (45° and 90°), to regulate the four-speed level and to activate the timing function. There is also a speed indicator that, thanks to chromatic variations, shows the end-user the current speed level.

ESSENCE is available both in recirculating and in ducting version. This second option can be realized with the external motor SEM1,

SEM2, SEM10, and SEM13.

One product only, diverse combinations to satisfy any need of the user. Easy installation and maintenance are beloved features to Sirius. ESSENCE has two patented filters, easy to remove, with an oil and grease collector included, which can be washed in the dishwasher.

The perfect balance between technology and aesthetics makes ESSENCE an easy to use product, reliable and innovative, which adds personality to your kitchen.
